

**Amendments to the Specification**

Please amend the following paragraphs of the Specification as indicated:

[0001] This is a divisional application of co-pending U.S. patent application Ser. No. 09/923,763, filed Aug. 6, 2001, which issued on May 11, 2004 as U.S. Patent No. 6,732,875.

[0077] A mounting portion 260 depends from the lower edge 258 of the side wall 254. The mounting portion 260 includes a generally annular flange 262 and a generally annular skirt [[264]] 263. The mounting portion 260 is adapted for rotatably connecting the overlay 250 to the mounting portion 222 of the cover 212 such that the overlay 250 and the cover 212 are in rotatable engagement. The mounting portions 222, 260 are cooperatively dimensioned such that the overlay 250 can be positioned about the cover 212 wherein the overlay 250 can be rotatably moved with respect to the cover 212. The mounting portions 222, 260 have a generally annular configuration. Alternately, the mounting portions 222, 260 could have a configuration with angular or linear segments.
